In short i need to charge a 72 volt battery bank from 12 volt (960W total) panels . I recently bought an old Miles Electric pickup truck that has a 72 volt battery and would like to only charge it primarily from the sun. I've been looking for some time, but i cannot seem to find any controllers that go from a 12v PV setup to a 72v battery.

The idea would be to use a transfer switch to change between grid or battery power. For this to work with the existing panel, it would be necessary to have split phase 120-0-120V AC output from the inverter. Does anyone know of 72V inverters that can do this (either with one inverter, or two inverters wired together)? Thanks in advance!
