

28V lithium battery pack

What is a 28 volt lithium ion battery pack?

28-volt Lithium-Ion battery packs power the entire Milwaukee M28 System of power tools. The V28 Lithium-Ion battery pack offers up to twice the run-time of an 18-volt NiCd or NiMH pack and is actually lighter than 18-volt NiCd and NiMH packs! Lithium-Ion technology allows consistent fade-free power meaning the first cut is as powerful as the last.

What is a M28 lithium-ion battery pack?

The M28(TM) Lithium-Ion Battery Pack is built to handle high-torque applications on the jobsite with ease. Managed by Milwaukee's exclusive REDLINK(TM) Intelligence, the battery features overload protection to prevent you from damaging your cordless power tools in heavy-duty situations, while the discharge protection prevents cell damage.

What is a M28 & V28 battery pack?

The temperature management system and individual cell monitoring help maximize battery life. Use this high voltage lithium-ion battery pack to power your Milwaukee M28(TM) and V28(TM) cordless power tools. Thank you for sharing this product. Your email has been sent. A technical issue occurred while submitting your request, please try again another time.

What is a lithium-ion battery pack?

Brief content visible, double tap to read full content. Full content visible, double tap to read brief content. Looking for specific info? Lithium-ion battery pack is efficiently designed to deliver dependable, long lasting power and ideal for use with the entire Milwaukee V28 system of power tools.

Does a V28 battery pack have a memory?

V28 Lithium-Ion battery packs will never develop a memory and can be charged at any time regardless of the pack's current charge level! Press the fuel gauge' button and LED indicators display remaining charge left in the pack, providing an ideal way to check the state of the pack before you climb onto a roof or up a ladder.

The compact portable Lithium Ion Start Pac LI2000QC starting unit is a full 28VDC battery pack and will provide superior starts on small to medium size turbine engines. It has a built-in charger with a total of 3.5 amps output and a recharge time of approximately six hours.
