

## AC Inverter D720

What is a Mitsubishi d720 series AC frequency inverter?

Mitsubishi Automation D720 Series AC Frequency Inverter for 0.55kW (0.75HP) or 0.75kW (1HP) 230V 3 Ph motor in VxF or Vector control to 4.2A. Simple to set-up and converts single phase 230V input to three phase 230V for a standard AC Induction motor. Includes E8 Washing Machine Software. Size 1C: 68mm wide x 162.5mm deep x 128mm high.

What is a D700 inverter drive?

\*Delivery dates may change based on your chosen quantity and delivery address. The D700 is an ultra-compact, micro drive solution inverter drive range, designed for simple installation and set-up. o Simple cabling, the integrated spring clamps connect control and power lines quickly which ensures reliability and simple cabling.

What is a Mitsubishi inverter drive?

This Mitsubishi Inverter Drive is a single-Phase In and has a power rating of 1.5kW. The supply voltage is 230 V ac. Being part of the ultra-compact series, VFD has an overall length of only 128mm. Because of the small size, the setting up process is very simple and the drive is easy to handle.

What is a fr-d700 variable frequency drive?

o Direct connection of an external braking resistor which improves stopping power. o The FR-D700 variable frequency drive (VFD) is typically used in standard applications due to it being user friendly and useful. o You will usually find these types of VFD being applied in feeder and conveyor drives, machining tools, gates and door drives.

What commands do inverters need?

The inverter needs frequency command and start command. Frequency command (set frequency) determines the rotation speed of the motor. Turning ON the start command starts the motor to rotate. Set the required parameters according to the load and operating conditions.

What makes a good inverter drive?

The circuit boards are protected against aggressive environments with single or double layer conformal coating, this is another great feature that prolongs the service life of the Inverter Drive.

Mitsubishi D720 Series AC Frequency Inverter, type: FR-D720-100-E8, with Option E8 for 2.2kW (3HP) 230V 3 Ph motor in VxF or Vector control to 10A. Simple to set-up and converts single phase 230V input to three phase 230V for a standard AC Induction motor. Includes E8 Washing Machine Software (Check for availability before purchase as these are ...
