What is uninterruptible power supply (UPS)?

Uninterruptible Power Supplies (UPS) have reached a mature level by providing clean and uninterruptible power to the sensitive loads in all grid conditions. Generally UPS system provides regulated sinusoidal output voltage, with low total harmonics distortion (THD), and high input power factor irrespective of the changes in the grid voltage.

What is a short-term and best solution for instant and back up supply?

Therefore, in such circumstances a short-term and best solution for users in terms of instant and back up supply can be through Uninterruptible Power Supply (UPS); it could be more effective and efficient with hybrid storage source and active power filter.

Can uninterruptible power supplies be used as a hybrid storage system?

Uninterruptible Power Supplies with hybrid storage system Uninterruptible power supplies with batteries as storage source provides good performance during grid interruption and blackout by supplying instant backup energy. However batteries cannot provide backup for a very long period of time and have limited charge/discharge cycles.

How to regulate the output of a UPS system?

Generally the output of the UPS system must be regulated sinusoidal with low total harmonic distortion (THD), irrespective of the changes in the input voltage and abrupt changes in the load connected to the system.

What is the minimum power factor for UPS?

According to the IEEE standard ANSI/IEEE 446-1987, minimum power factor is 0.8 at the rated load and harmonics content less than 5% is preferred for the input rectifier of the UPS system. Table 8. Typical 3- and 4-wire UPS System Specification by ANSI/IEEE 446-1987. Fig. 27. Input Voltage and Current waveform.

How intelligent UPS system is designed for Microgrid?

Fig. 25. Block Diagram of Intelligent UPS system. Line interactive UPS systems proposed in [1], are designed for microgrid. The proposed system helped in improving the reliability, economy, and efficiency of the microgrid. Power can be exported to the grid when the tariffs are advantageous.
