What is the largest solar power plant in Serbia?

"The DeLasol solar power plant is the largest PV facility in Serbia and an example of how by using solar energy we can simultaneously improve the security of electricity supply and environmental protection," said Energy Minister Dubravka Dedovic. The facility has a capacity of 9.9 MW and occupies an area of 12.5 hectares.

How much solar will Serbia have by 2024?

Serbia is currently targeting to deploy 8.3 GW of PV by 2024, according to a new plan recently drafted by the government. Utility-scale PV projects could be built on 200,000 hectares of neglected, low-value agricultural land that could host 2 GW of solar, according to the draft.

How much does ProCredit banka Srbija pay for a solar project?

ProCredit Banka Srbija agreed to finance the project with EUR 9 million (\$9.8 million). The lender had previously financed two solar projects built by MT-Komex in Kladovo. Serbia is currently targeting to deploy 8.3 GW of PV by 2024, according to a new plan recently drafted by the government.

Could a utility-scale solar project be built on neglected land?

Utility-scale PV projects could be built on 200,000 hectares of neglected, low-value agricultural land that could host 2 GW of solar, according to the draft. The draft also envisages the construction of around 300 MW of PV plants, valued at EUR 200 million, on land owned by state-owned power utility EPS, primarily on its coal ash dumps.

How much does it cost to install a rooftop solar system?

These projects are being developed at industrial facilities whose rooftops span 3,000 square meters or more. The cost of installing a rooftop solar system for businesses is about EUR 650 per 1 kW of installed capacity for power stations of more than 30 kW and EUR 600 per 1 kW for those whose capacity exceeds 100 kW.
