

Black Mountain Container Generator

What is a containerized generator?

Less Maintenance The Containerized Series generator sets are designed for harsh weather and strict acoustical standards,utilizing a standard 40' high cube container equipped with an array of innovative features,allowing the system to operate reliably even in the hottest environments - validated at ambient temperatures of up to 55 degrees Celsius.

What are mg containerized gensets?

MG containerized type gensets use advanced sound-absorbing materials,scientific and unique design in airflow and noise control. The container is with CSC certification,in line with international container security convention,ensures shipping directly as a standard container,and greatly saves the cost of transportation.

What is a Tier 4 containerized generator?

Our Tier 4 containerized generators are high-powered --500 kW to 1250 kW-- units packaged in 30-foot or 48-foot ISO containers.

Why should you buy a Cummins containerized generator set?

More Robust. More Control. More Reliability. Factory pre-integrated and customizable per site requirements,the new Cummins Containerized Series generator sets can provide significantly shortened lead time for installation,and a lower cost of ownership via a flexible design.

Are containerized generators reliable?

Years of use in the rental, oil and gas, mining and other heavy-duty industries have tested the reliability, usability and durability of our containerized generators. Our primary design challenges in developing this line of containerized generators were usability, reliability and functionality for the end user.

What is a dual pack generator?

Simply put,dual packs are two parallel generators in one ISO container: Two 500 kW generators could be paralleled to achieve a 1000 kW output,or two 625 kW generators to achieve 1250 kW. This dual configuration increases the longevity of the overall unit by preventing the effects of light loading.
