volumes, and their percentage changes are included as well. This indicates Botswana's progress over time, towards generating adequate electricity to meet her demand. The data used in this brief is sourced from the Botswana Power Corporation. This statistical brief is intended to apprise on Electricity Generation, Importation and Distribution by

Botswana's power system has been characterized by unreliable power supply, lack of investment, poor maintenance and high service costs. To meet its peak power demand, Botswana imports power from the Southern Africa Power Pool - mainly from South Africa - and when imports are not available, resorts to the use of costly backup diesel power plants.

The corporation has been floating solar power projects in different areas of the country, these including 3 photovoltaic power projects in Maun, Lobatse and Ghanzi, and a 100 MW solar PV for Jwaneng. With 212 billion tons of coal, coal-fired plants remain the foundation of the GoB's energy framework and current peak demand of approximately ...
