Is Romania ready for a new wave of photovoltaic capacity deployment?

Solarplaza Summit Romania 2023. Image by Solarplaza on LinkedIn. After experiencing a burst of solar installations almost a decade ago, Romania is now said to be at the start of a new wave of photovoltaic (PV) capacity deployment.

When will Romania's largest solar park start generating power?

Nofar is building Romania's largest solar park, a 154-MW facility in Ratesti, which will start power generation most probably in July. This project did not have to deal with the 50-ha limitation as it was in the ready-to-build phase before the rule was introduced, Andreea Gilicel, financial manager at Nofar Energy, told Renewables Now at the event.

How much solar power does Romania have in 2023?

According to data presented at the Solarplaza Summit Romania event by the Romanian Photovoltaic Industry Association (RPIA), at the beginning of 2023 the country had 1,413 MW of installed solar capacity, most of which was built before 2015.

Who attended solarplaza's second event in Bucharest?

Solarplaza's second event in Bucharest attracted a diverse range of attendees, including investors, developers, EPC companies and equipment providers. The attendance was significantly higher than the first event, indicating an increased interest in the Romanian market.

Does Romania need energy storage for grid balancing?

Bogdan Stan, key account manager Romania at Sungrow, told Renewables Now on the sidelines of the event that there is big potential for energy storage for grid balancing in the country but the market is not set up yet.

How much will solar panels cost in 2023?

The 2023 budget for this programme is planned to be RON 2 billion (USD 449m/EUR 406m). Claudia Griech, chief executive of E.ON Energie Romania, told the Solarplaza audience that in five years there could be about half a million homes with solar panels.

Austrian renewables developer Kraftfeld sold an 80 MW ready-to-build photovoltaic (PV) project located in Romania's southern municipality of Rascaeti, Dambovită county, to Swiss-based energy company MET Group for an undisclosed amount, Romanian law firm Vlasceanu and Partners said on Tuesday. ... Solar panels. Image by: Southern Power. ...

Econergy and RGreen Invest inaugurate new PV park with solar tracker technology in Brasov County ... The Parau solar park is the largest park with trackers in Romania, a mechanism that allows the panels to change

Bucharest sells new solar photovoltaic panels

their position depending on the sun. ... With a total installed capacity of 92MW, Parau is currently the largest photovoltaic park ...

Real estate developer Portland Trust has sold a photovoltaic project in Dâmbovită County, which occupies an area of 290 hectares and could power a city the size of Braila. It is the largest park of photovoltaic panels under development in Romania, with an authorized production capacity of over 153 MW. The photovoltaic park was sold to Nofar Energy, an Israeli ...

Premier Energy and Motor Oil Renewable Energy Single Member S.A. signed the development of two photovoltaic projects with a combined capacity of 86 MW and 18 MW of storage capabilities. Through Alive Renewable Holding Limited and Motor Oil Renewable Energy Single Member S.A. ("MORE"), Premier Energy Group has signed the acquisition of two new ...

Sunshine Solar Energy Romania - Heritage "Spin off" of COGER Constructii, an established player in the infrastructure and consulting business based in Romania since 2004. Sunshine Solar Energy - Renewable & Alternative Energy. Solar ...

Kärcher invests EUR100,000 in equipping HQ with PV panels Kärcher, a company in the field of cleaning technology, has invested almost EUR100,000 in equipping the headquarters inaugurated last year in Pipera with photovoltaic panels. To date, the company has reduced its costs for conventional consumption by approximately 45%.

In Romania, 10,000 photovoltaic systems can be installed every month. ... Columbus sells more solar projects to GoldenPeaks. ... has included eight new photovoltaic power plants--totaling 882.4 MW--in their renewable energy development portfolio. POPULAR. 1. Energy. 2 months ago.

Romania has set ambitious targets for developing renewable energy sources, including solar power. This article provides a comprehensive overview of the current state of large-scale PV projects in Romania, covering ...

Danone Romania has completed an investment of EUR1 million in the acquisition and installation of photovoltaic panels, which will provide 20% of the electricity consumption of the factory in Bucharest. ... Columbus sells more solar projects to GoldenPeaks ... together with PPC Renewables, has included eight new photovoltaic power plants ...

In 2023, Romania also witnessed a record-breaking year for solar, adding over 1 GW of new capacity through distributed generation and utility-scale projects. This marked a 308% increase compared to the capacity deployed in 2022, establishing solar PV as the fastest-growing power source in the country the end of 2023, the cumulative PV capacity, encompassing ...
