

Cape Town Energy Storage Equipment Factory

Where is the first gigawatt energy storage factory in Africa?

Energy storage company Solar MD has officially opened the first gigawatt factory on the continent, capable of producing up to 3GWh of energy storage annually. The 15,000-square-metre factory, located in Cape Town, has been operational since July. However, it was officially inaugurated on Saturday, 30 November 2024.

Why did solar MD open its first gigawatt factory in Cape Town?

Solar MD officially opened Africa's first gigawatt factory in Cape Town to support the company's commitment to developing and manufacturing high-performance energy storage solutions that maximise the potential of renewable energy resources.

Why should Cape Town invest in solar power?

"Not only does this investment fuel Cape Town's drive towards a smarter, cleaner and more secure energy future, but it also makes this metro the base for the production of these batteries that are exported into Africa and Europe." Solar MD says the factory can produce up to 3GWh of energy storage in a year.

Is Balancell the fastest growing energy company in South Africa?

Balancell was recently named among the "fastest-growing companies" locally, in a list compiled by News24, together with Financial Times and Statista. Battery energy storage has become a key component in SA's just energy transition and diversifying the existing generation energy mix.

Is battery energy storage a key component of SA's energy transition?

Battery energy storage has become a key component in SA's just energy transition and diversifying the existing generation energy mix. Power utility Eskom recently unveiled what it says is the first of its kind and the largest battery energy storage system (BESS) project.
