

Cheap and good outdoor power supply

A portable power station is a device that stores electrical energy and can supply power to various electronic devices and appliances. It works by using a rechargeable battery or multiple batteries to store energy, which can be converted to AC power or DC power through inverter technology.

That's what I was thinking, 12V DC supply at nearest convenient source of AC power, then send that out on cheap zip cord and regulate down to 5V DC at point of use. Unless it's so far out that the wire would be costlier than a decent solar setup, though I would assume it isn't very far with an IP camera.

Beware cheap USB power supplies. This is the reason I went with the expensive apple one. It's cheaper than replacing the gear plugged into it, or dealing with the headache of a device rebooting or just being flakey due to unstable power.

Runner Up: EcoFlow River 2 Series - This series is my 2nd pick because the brand has a very good reputation. Their power stations charge very quickly and have long lifespans. Best Budget Power Station (Also Best Lightweight Power Station): Westinghouse 194 - This power station is cheap and lightweight because it uses older Li-ion battery ...
