What is the best portable power supply for camping?

The EcoFlow River is the best portable power supply for camping. It's rugged, efficient, and smarter than bulky, fuel-powered generators. With a built-in handle and the ability to be charged via car port, wall outlet, or solar power, the River is easy to transport and perfect for outdoor use.

Should you buy a portable power station?

Over the past few years, as people have turned away from gas-guzzling generators, portable power stations have enjoyed a meteoric rise. Whether you're camping for the weekend, living off-grid, or protecting against power outages, these big batteries can help. You can buy tons of power stations with varying portability and capacity.

What spec should you consider when buying a power station?

Whatever the reason you are purchasing a power station, the most important spec to pay attention to is watt hours, which is a measurement of how much energy the power station can hold. While a particular power station might claim to hold 1,000 watt hours, the actual amount of usable power you can get out of it is a different story.

How do I choose a portable power station?

Price: Portable power stations can be very expensive, but discounts, sales, and deals are common. If you can afford to wait, you can very likely get your chosen power station for less. Capacity: Figure out how much power you need. The capacity is listed in watt-hours (Wh) or sometimes kilowatt-hours (kWh).

How do I choose a good power supply?

It's best to find your portability-to-capacity sweet spot. Focus on the 150 to 300-watt-hour capacity range for the best balance of price and power. Under 150Wh limits your power and runtime, while over 300Wh will quickly surpass the \$200 budget. Match the watt-hour capacity to your expected power needs.
