Do you offer custom solar combiner boxes?

Here in SUNTREE, we offer custom solar combiner boxes to ensure that our clients' preferences are met. We provide custom features that introduce the general inverter requirements, including your logo, box measurement, components, DC inputs and outputs, and chosen over-voltage protection degree.

What types of combiner boxes do Suntime electric offer?

Discover Suntime Electric's comprehensive range of combiner boxes, including DC, AC, and hybrid DC+AC solutions. Ensure efficient power management with our high-quality enclosures.

What is a combiner box?

Our combiner box is waterproof, dustproof and anti-corrosion, resisting harsh conditions for long-term and uninterrupted use. We offer multiple strings input up to 24 solar strings, with a maximum of 30 A per string. Series Isolator Switches with a max voltage up to 1500V DC widely meet various demands from PV power systems.

What is a DC combiner box?

DC combiner boxes link PV inverters and PV arrays, combining the output of a large number of strings to improve PV performance. Through the design of our combiner box, we enable easy integration of additional functions, such as the inclusion of switches and a second MPPT.

In a photovoltaic system, the modules are arranged in strings and fields depending on the type of inverter used, the total power and the technical characteristics of the modules. ABB offers a plug & play solution that accommodates overcurrent protection devices, disconnectors and surge protective devices (SPDs) in one solar combiner box.

Eventually the company started manufacturing of Solar DC product and keeping good example in China and become the first one of company to making solar new energy product. Now we have 2 big factory for manufacturing PV System and Low-voltage Electrical Product, Circuit Breaker, Contactor, Isolator Switch, Combiner Box, Automatic Transfer Switch.
