

Container energy storage transformation in Toronto Canada

How many MW of energy storage projects are there in Canada?

"At Energy Storage Canada we're excited to see the IESO's announcement of more than 700 MW of energy storage projects as the next step in Canada's largest energy storage procurement to date," said Justin Rangooni, Executive Director, Energy Storage Canada.

Where can I find information about energy storage in Canada?

For further information visit: 16 May 2023 Today the Independent Electricity System Operator (IESO) announced seven new energy storage projects in Ontario for a total of 739 MW of capacity.

Which energy storage projects are advancing in Canada?

In addition to BESS projects, there are also many Long Duration Energy Storage (LDES) technology-based projects advancing in Canada such as compressed air, pumped hydro and other non-lithium ion battery chemistries. About Energy Storage Canada: Energy Storage Canada is the only national voice for energy storage in Canada today.

How big is Canada's energy storage capacity?

The province achieved a major milestone last summer with the IESO's procurement of over 880 MW of energy storage capacity, the largest in Canada - and as the initial stage of an ultimately 2,500 MW addition, one of the most ambitious such initiatives anywhere in North America.

Why is energy storage important for Ontario's electricity system?

"Energy Storage of all types and durations is going to be critical to meeting the future needs of Ontario's electricity system and this absolutely includes leveraging the value energy storage systems can provide as DERs," said Justin Rangooni, President & CEO, Energy Storage Canada.

Could 1000 MW of energy storage Save Ontario electricity?

A 2020 report commissioned by Energy Storage Canada, *Unlocking Potential: An Economic Valuation of Energy Storage in Ontario*, found that 1000 MW of energy storage in Ontario could provide as much as \$2.7 billion in savings for Ontario electricity customers.

Also, at ETC CanREA unveiled a new clean-energy procurement calendar, a central resource for wind, solar and energy storage procurement opportunities across Canada. The beta version of this calendar, launched in mid-October 2024, contains more than 10,000 MW of procurements, currently either underway, being procured, or being planned.

Microgreen solutions provide reliable power and energy storage for off-grid regular loads, grid-support cases and emergency back-up, with switchable energy input from renewable energy, a grid connection or diesel
