So, how do heat pump hot water systems produce hot water out of cold air? Refrigerant is how! You see, we humans think a cold day is 10 degrees but the evaporator in a heat pump hot water system has refrigerant inside that is much cooler, say minus 10 degrees. This means there is a 20 degree temperature difference, allowing the system to absorb 20 degrees ...

Sunny Side Solar Solutions" service has been excellent - the system and permitting was completed as per the agreement and everything has been running well. The one service issue we had was fixed promptly and Lester got the system back up and running immediately. Lester provides excellent service and value for solar projects in Costa Rica.
