

How many solar power plants are there in the Czech Republic?

At the end of 2021, there were over 50,000 photovoltaic power plants with an installed capacity of about 2200 MWp in the Czech Republic. There were 500 solar parks with a capacity of over 1 MWp. During 2022, the number of installations rose to almost 85,000 PV plants with a total capacity of 2,460 MWp.

How many solar parks are there in the Czech Republic?

There were 500 solar parks with a capacity of over 1 MWp. During 2022, the number of installations rose to almost 85,000 PV plants with a total capacity of 2,460 MWp. The development of wind energy in the Czech Republic also continues apace.

How many solar power plants did Czechia build in 2023?

Czechia built around 1 GW of new PV plants in 2023, according to data from the Czech Solar Association (Sol’n’ Asociace). In total, 82,799 solar power plants were connected to the grid, with a combined total output of 970 MW. The nation achieved a record-breaking year with 145% growth, connecting 49,000 more power plants than it did in 2022.

Why is the solar market growing in Czechia?

The figures mark a period of rapid growth in Czechia's solar market. The growth has been largely driven by residential PV, with most of the new installations (80,069) being domestic PV plants, supported by the country investing an additional CZK 55 billion (\$2.5 billion) in its New Green Savings program back in March 2023.

Will the Czech Republic invest in solar power?

The Czech Republic will have hard time looking for someone willing to invest in the sector, "the Czech Solar Association Chairman Jan Krcmar said. Majority state-owned electricity producer CEZ (CEZ.PR) plans to invest \$4.15 billion - four times its 2020 profit - into building 6 gigawatt of solar power capacity by 2030.

Does Czechia need more energy storage capacity in 2023?

Czechia registered strong PV capacity growth in 2023, driven by a surge in residential installations. The nation's PV association says it expects a shift toward larger power plants in the coming year, but notes the need for more energy storage capacity.
