Will solar power Dakar bivouac and electric vehicle charging points work?

GCK Energy and Saudi-based solar energy firm Desert Technologies are ramping up its provisions for solar energy to power the Dakar bivouac and supply charging points for electric vehicles in preparation for its shift towards entries run on renewable power.

What is Dakar future?

Dakar director David Castera launched the event's DakarFuture vision during a press conference at the Neom bivouac, the location for the ninth stage of the 2021 edition. The green vision falls in line with Saudi Arabia's plans to become oil revenue independent by 2030.

Will Dakar be a full transition in 2030?

The Amaury Sport Organisation, which runs the Dakar Rally, has unveiled further details of its alternative energy timeline ahead of a full transition in 2030. Dakar director David Castera launched the event's DakarFuture vision during a press conference at the Neom bivouac, the location for the ninth stage of the 2021 edition.

Will Dakar be electric or hybrid in 2023?

In 2023, it is expected that three top teams will contest the Dakar using electric or hybrid technology, while at least one test prototype will run using hydrogen. The ASO plans to have the electric/hybrid category "full" by 2025 before all elite cars and trucks are required to switch to 100% alternative energy by 2026.

Why is the Dakar Rally so important?

The Dakar has always been a particularly demanding laboratory for constructors looking to innovate. Quite naturally, today the rally acts as an exceptional test bench for hybrid and electric vehicles. In the future, they are likely to be the focus of prestigious competitive stakes once special distinctive categories have emerged in the discipline.

Will Dakar 2023 have a hydrogen-powered car?

Cyril Despres and Mike Horn presented a Gen-Z project targeting to be at the start of the 2023 Dakar with a hydrogen-powered car. In the truck category, Gaussin Group revealed a hydrogen-powered truck project, while Kolen Industries offered an electric hydrogen-powered truck plan.

Dakar is situated on the Cap-Vert peninsula, the westernmost point of mainland Africa. [5] Cap-Vert was colonized by the Portuguese in the early 15th century. The Portuguese established a presence on the island of Gor#233;e off the coast of Cap-Vert and used it as a base for the Atlantic slave trade. France took over the island in 1677. Following the abolition of the slave trade and ...
