What is a bifacial module?

A bifacial module is a photovoltaic module that can generate electricity from both sides. The rear side cover consists of either glass or a transparent polymer back sheet.

Why do bifacial modules need double-glass encapsulant?

There are also the associated costs of the double-glass design and extra mounting support required for the heavier modules. Almost every bifacial module manufacturer has begun opting for polyolefins (POE) encapsulant instead of the traditional EVA. This is to maintain the enhanced reliability of the double-glass design.

What are I-Topcon double glass PV modules?

The new i-TOPCon double glass PV modules integrate these N-type bifacial i-TOPCon cells with over 80% bifaciality, multi-busbar (MBB) design, full square monocrystalline cells, dual-side and half-cut technologies.

They will focus their production solely on double glass modules, using the highest quality raw materials, (like High quality N-Type Bifacial solar cells, ultrathin 2mm fully tempered glass for a long life of the module and POE ...

We warmly welcome you to wholesale or buy discount topcon bifacial 710w n type solar module in stock here from our factory. Good service and low price are available. ... N-type 710W solar panel double glass Bifacial module, high efficiency power efficiency reaching 22.86%. Linear output power guarantee, 25 years: 89.4% power output, 30 years ...
