In addition, double-glass panels keep sand from getting into the inner components and causing expensive damage. While traditional panels have proven efficient and resilient in many places, they are more prone to stress from wind, snow, and other elements. Dual-glass modules have glass sheets on the front and back.

The medium-format n-type series modules adopt 210R rectangular silicon wafer design. ... The bifacial double glass module produces more energy. Our N-type models have superior bifaciality. This means that the rear side of the module can produce up to 85% of the energy generated by the front side. Thus, the panel generates more energy overall.

The JAM72D30 525-550/MB solar module, proudly offered by JA Solar, represents an exceptional fusion of cutting-edge technology and sustainable energy solutions. With a power output ranging from 525 to 550 watts, this module is a true powerhouse, tailored for a wide spectrum of solar applications, from residential rooftops to large-scale commercial projects.

L'objectif de SUNPAL Power est de fabriquer et d'offrir des modules photovoltaïques fiables et innovants TOPCon N-Type Bifacial Double Glass 108 cellules demi-coupées (6\*18) avec une puissance allant de 420 Watt/ 425 W/ 430 W/ 435 Watt / 440 W ; partir d'un automate. -Usine expérimentale exploitée au coût le plus raisonnable.
