

Dual battery powered solar lights

What is a solar USB security light?

Solar USB Security Light - Provide an eco-friendly safety net to your home with a high quality LED spotlight -- produces 800 lumens of bright white light from two adjustable heads

Can a security light be powered by a solar panel?

Multiple Power Options - Solar panel supplies the security light with a clean and renewable source of energy while 4 D batteries (not included) act as a reliable backup -- you can also plug the USB cable into any 5V, 2A port or adapter (not included)

What are all in two solar street lights?

All in two solar street lights are mostly used in commercial solar lighting projects & municipal engineering lighting projects. GM Series All In Two Solar Street Light 20W-120W (LiFePO4 lithium battery built into lamp body, no sensor) FD Series All In Two Solar Street Light 120W-200W (LiFePO4 lithium battery built into lamp body, with sensor)

How much power can a solar panel provide?

Solar panel maximum to 400W, provide high charging efficiency. The lithium battery can be fully charged within 5 hours. Battery capacity can be increased to twice based on the current battery capacity on the market to provide continuous brightness without dimming or sensor function and longer backup rainy days.

How to choose the right solar light for your business?

For commercial solar lighting, it must be with a high spec of LiFePO4 battery and a solar panel that can ensure light works at 100% brightness for 12 hours. Only with real high specification, the light can work well even in winter or on cloudy days.
