

Energy storage container manufacturer in Auckland New Zealand

Which energy company is building New Zealand's first grid-connected battery energy storage system?

Meridian Energy is building New Zealand's first large-scale grid-connected battery energy storage system (BESS) at Ruakaka on North Island. Paris, January 10, 2023 - Saft, a subsidiary of TotalEnergies, has been awarded a major contract by Meridian Energy to construct New Zealand's first large-scale grid-connected BESS.

What is a battery and solar farm in New Zealand?

The battery system is the first stage of a project that will go on to include a co-located 130 MW solar farm. The battery and solar farm will be part of New Zealand "gentailer" Meridian Energy's envisioned Ruakaka Energy Park, one of the biggest renewable projects planned for the country. Site map of the Ruakaka Energy Park

Who is Taspac Energy?

Taspac Energy is NZ's premium supplier of Solar PV and Energy Storage Solutions. 100% Kiwi owned, Taspac was founded in 2014 with a very simple goal - to provide best-in-class renewable energy solutions to New Zealand solar installers and electricians, backed up with a high level of local sales, technical and warranty support.

Where is New Zealand's first big battery being built?

New Zealand's first big battery is slated for construction in Ruakaka, on the country's North Island, about 150 kilometres north of Auckland. The battery system is the first stage of a project that will go on to include a co-located 130 MW solar farm.

Will a 100-megawatt solar farm improve New Zealand's national grid?

Located at Ruakaka in the country's North Island, the 100-megawatt (MW) BESS will improve the stability of the national grid, as intermittent renewable power generation increases in New Zealand. The BESS is the first stage of a project that will include the construction of a co-located 130 MW solar farm by Meridian Energy.

Dangerous goods (DG) shipping containers are specialised storage units designed for the safe containment of dangerous and hazardous items. Featuring a bunded floor, top and bottom vents, and a stainless steel release valve to drain spillages, these purpose-built containers help protect people and the environment.

Saft, whose "turnkey" containers also feature power conversion and control systems, said the contract win will be the company's third utility-scale storage project to add flexibility to the New Zealand grid. The energy storage project is expected to come online during the July-to-September period of 2026.

Why build a Battery Energy Storage System now? There is growth in renewable energy generation as New

Energy storage container manufacturer in Auckland New Zealand

Zealand moves to a low carbon economy. But renewable energy like solar and wind are intermittent which means Battery Energy Storage Systems, which can be flicked on to supply power quickly, are important to manage winter peaks, and to make the national power ...
