Greece 24V Inverter

A great little solar inverter. What I like best is the size. Most batteries only support a 100A draw. At 24V that is 2400W, so this inverter is right sized for the common 100A 24V lithium batteries that you can get for about \$600. A bigger inverter would stress the battery. It's compact, lightweight, quiet, and efficient.
