

Household lighting split solar lights

What is a split solar street lamp?

The SF series Split Solar Street Lamp is LUXMAN's new split type solar LED lighting solution. It's a revolutionary product that optimizes sunlight absorbing and solar conversion rate with a 100% solar-powered system for self-sustained lighting.

What is split lighting in photography?

In photography, split lighting is a lighting technique where the light reaches the subject at a 90-degree angle, creating a straight line down the middle of the subject's face with one side wholly bright and the other completely dark. This is an excellent choice for a dramatic portrait, particularly when using hard light instead of soft.

What is a solar split system?

It's a revolutionary product that optimizes sunlight absorbing and solar conversion rate with a 100% solar-powered system for self-sustained lighting. This split design allows the installation personnel to adjust the orientation of the solar panel to collect the greatest amount of solar energy.

How long does a solar street lamp last?

Once fully charged, split solar street lamp with auto intensity controller will ensure the lighting for 12 hours a night in 7 rainy days. The user enjoys 365 days of lighting without worrying about lights off. The solar panel of light fitting can be rotated 360°; horizontally & vertically.
