

# How to choose UPS uninterruptible power supply in South Tarawa

A UPS won't die when there's a grid failure or power surge. The UPS is connected to the grid, but whereas anything drawing power solely from the main supply will be interrupted, the UPS battery keeps it working. A UPS also protects equipment from electrical damage and data loss that can occur during a power surge.

This tip discusses how to choose the right-sized uninterruptible power supply (UPS) for your data center. It also explains common mistakes in UPS sizing and why UPS power ratings can be so confusing.
