Mastervolt sine wave inverters can deliver high peak power (up to 200 %) to equipment that requires extra current for a short period of time while powering up. Simple and safe to connect. The inverters feature robust connection technology, internal in the larger models and a plug & play socket with cable for the smaller models.

Adopted low frequency isolated transformer, safe and reliable, single phase input power is completely isolated from three phase output power, high conversion efficiency, high instantaneous power, stable performance and low load loss. ...

The AIMS Power 5000 Watt inverter with 240 volts AC output is a great choice for an off grid well pump that requires 240VAC to operate. However, keep in mind that this inverter is not a "split phase" 240VAC; you will not be able to pull one leg off to create 120VAC. The 240VAC supply is accomplished through one of the two AC receptacles, or the direct connect terminal block. ...
