The Inverter with double Battery set Combo comes with 2 batteries of 135 Ah and it will run all your home appliances such as Lighting load, Refrigerator, Grinder juicer Mixer, Desktops etc. for 6-8 hours. The UPS is Capable of handling a power load of 1200 watts.

What is a dual battery system?

Dual battery systems are secondary battery system (in addition to your normal starter battery) that is used for external power. This secondary battery is used as a power source for auxiliary gear and accessories. A dual battery system requires more than just a second battery though.

What is a dual battery system in a 4WD (four-wheel drive) setup?

A dual battery system in a 4WD (four-wheel drive) setup is designed to provide additional power for various electrical accessories and equipment while ensuring the vehicle's main starting battery is always capable of starting the engine.

What is the best dual battery system for a 4WD?

When it comes to dual battery supply & fit, Jack Frost 4X4 OFFROAD can help pick the best dual battery system for your 4WD. Our expert technicians will also run through the best possible installation methods to get the best results. We offer dual battery setup products from RedArc, Invicta, Maximus, Baintech, and Projecta.

Does a dual battery system need a second battery?

A dual battery system requires more than just a second battery though. For a typical dual battery setup, you'll want to connect your secondary battery to your starter battery, allowing you to charge both batteries from your alternator but this requires the appropriate wiring, via dual battery wiring kits.

How do I connect a dual battery to my alternator?

For a typical dual battery setup, you'll want to connect your secondary battery to your starter battery, allowing you to charge both batteries from your alternator but this requires the appropriate wiring, via dual battery wiring kits. The other requirement is a battery isolator.
