

Is Colombia s outdoor power supply safe

What is the power supply voltage in Colombia?

In Colombia the supply voltage is 110V. If the appliance or its power supply are not dual voltage rated, the single voltage appliance will have to be used alongside a voltage transformer or converter to allow the appliance to work safely and properly (unless the appliance operates at 110V).

Can Canada use a 110V outlet in Colombia?

Canada uses outlet types A,B at a voltage of 110V and a frequency of 60 Hz. Plug Compatibility: Type A, Type B Voltage: 110V Frequency: 60 Hz Can North Americans use Electronics in Colombia without an Adapter? Yes! North Americans do not need a travel adapter or transformer when traveling to Colombia.

Do device plugs work in Colombia?

Most device plugs will work with the outlet types in Colombia. Also, the voltage in Colombia is the same as in North America. Please note: an adapter will be needed if your device plug has a grounding pin and you are trying to use a Type A outlet. For this reason, we always recommend traveling with a universal travel adapter.

Can I use a transformer in Colombia?

Electricity supplies worldwide can vary from anything between 100V and 240V. It can be extremely dangerous to use an electrical appliance that is rated at a voltage different from the supply. As voltage can differ from country to country, you may need to use a voltage converter or transformer whilst in Colombia.

What power plugs and outlets are used in Colombia?

In Colombia, there are two types of power plugs and outlets: Type A and Type B. Both types are used in airports, hotels, restaurants, etc., but they differ in terms of shape. Type A: Type A plugs have two flat prongs on either side of the plug.

Do I need a travel adapter or transformer when traveling to Colombia?

Yes! North Americans do not need a travel adapter or transformer when traveling to Colombia. Most device plugs will work with the outlet types in Colombia. Also, the voltage in Colombia is the same as in North America. Please note: an adapter will be needed if your device plug has a grounding pin and you are trying to use a Type A outlet.
