A portable 12v power supply is used for camping, emergency backup, outdoor events, or any situation where access to a standard power outlet is unavailable. A portable 12v power supply typically consists of a rechargeable battery, an inverter, a charger, and various connectors and cables.

At almost any outdoor event, there's the matter of electrical power to be agreed and sorted out, and assuming that you don't have your own generator, this is always, always something I insist that the organisers provide themselves. What I require is a suitable, safe power supply, preferably single-phase and not supplying anyone else on the site.

Learn how to run power outside safely with these outdoor electrical tips... Short-Term Power Supply (AKA: Extension Cords) For those in need of power outdoors for a short time, such as to trim your bushes, power a bounce house for your kid's birthday, or provide lighting for a party, an extension cord will get the job done for a day or two.

2. Turn Off the Power Supply. To keep yourself safe through the process, you first should completely shut off the power supply of the area you're working in. To do this, find your home's circuit breaker box. These are often in the garage. Then, locate the circuit that powers the indoor wall plug you'll tap into.
