Can a Danish socket accept E / F plugs?

A Danish socket will also accept plug types E and F. However, there is no grounding connection with these plugs because a male ground pin is required on the plug. Due to the widespread use of European appliances with E/F plugs, the Danish government allows the installation of type E or F sockets as well.

How much does electricity cost in Denmark?

Compared to the rest of Europe, the cost of electricity in Denmark is below average. In fact, the gradual phase out of the Danish green energy tax (PSO tax) will reduce costs even further to around 5 euro cent per kWh or less in 2021, according to [Danish Energy](#). This makes Danish electricity price levels highly competitive.

What type of plug fits in a Danish socket?

A Danish socket, which is type K, accepts plug types C, E, and F. However, only a type C plug provides a grounding connection, as it has a male ground pin.

In which countries are Type K receptacles used?

Type K receptacles are used almost exclusively in Denmark and Greenland. The Danish standard is described in DS 60884-2-D1. Unlike the similar type E plug, the grounding pin is not mounted in the receptacle, but it is on the plug itself. ([Click here for the full list of all countries that use type K](#))
