

How is Mopo redefining energy deployment across Africa?

MOPO's highly scalable model is redefining how energy is deployed across Africa without the need for unaffordable consumer finance through our revolutionary technology. MOPO currently has operations in six African nations, carrying out tens of thousands of MOPO battery rentals every day and plans to roll out the service across the continent.

How can Mopo become a leading African energy provider?

MOPO is aiming to become a leading African energy provider through pay-per-use battery technology. With operational rental services already thriving in Nigeria, DRC, Sierra Leone, Liberia, Chad, and Uganda, backed by solid financial structures, contracts, and strategic partnerships, MOPO is poised for rapid and expansive growth.

What percentage of Congolese people have access to electricity?

Less than 10% of the Congolese population has access to electricity, 35% in urban areas (50% in Kinshasa) and less than 1% in rural areas. There are also strong regional disparities in access to electricity. But, Congo has an immense development potential thanks to abundant hydrological and solar resources.
