

Laos new outdoor power supply field

The project includes the construction of a new 500-kV substation in Laos, a 183.5-km cross-border transmission line linking Namor in Oudomxay, Laos, with Xishuangbanna in Yunnan, China, and two 230-kV lines connecting ...

Ketsana Ratanalangsy, a Laos power supply technical officer who participated in the training session, said it was an enriching experience. "Powering the railway makes me feel fulfilled," Ketsana said. "Our people can move from province to province, and country to country, more quickly. It can help connect our countries more conveniently."

The plan needs 134.7 billion USD of funding to develop new power plants and power grids between 2021 and 2030. The figures would soar to between 399.2 billion USD and 523.1 billion USD by 2050, with a large part of which being allocated for new power plants and less than 40 billion USD for power grids.

In case of grid failure, the Nam Ou 3 HPP will start its emergency power diesel generator to start the Nam Ou 3 unit and restore full power supply. Then it will recharge and increase the voltage to the 230kV transmission line and the main transformer of the Pakmong 2 ...

Particulars of the cross-border grid can be described as follows. (1) Myanmar -> China: one 500Kv and two 220Kv lines; (2) China -> Vietnam: three 220Kv and three 110Kv lines; (3) China -> Laos: One 115Kv line. (4) Laos -> Thailand: two 500Kv, three 230Kv and six 115Kv (for power energy interexchange) lines; (5) Laos -> Vietnam: one 230 KV ...

Charin said the Tachileik electricity authority had switched on 50 per cent of power supply from Laos, with the balance expected within one to two days. "I have received unofficial information from the Provincial Electricity Authority in Chiang Rai, because we are under cooperation to monitor the Tachileik electricity authority's operations ...

It is vast and sparsely populated, making it suitable for the construction and development of new energy. The Oudomxay New Energy Base Project is the proposed supporting power supply project for the old and middle ...

Laos' 2011 Renewable Energy Development Strategy aims to achieve a renewable energy share of 30% in total energy consumption by 2025. The policy encourages investment in renewables and small power development for self-sufficiency and grid connection.
