

Liberia downgrades PV module exports

What is the National Energy Policy (NEP) in Liberia?

In 2009, Liberia developed the National Energy Policy (NEP) with the objective to ensure universal access to modern energy services in an affordable, sustainable and environmentally-friendly manner in order to foster the economic, political, and social development of Liberia.

Does Liberia have a global methane pledge?

In 2021, Liberia signed the Global Methane Pledge to support the collective effort to reduce methane emissions by at least 30 percent by 2030. The country has set a target to reduce GHG emissions, including methane, from the waste sector by 7.6% and from the agriculture sector by 49% below BAU levels by 2030.

Is Liberia a developing country?

Liberia is a least developed country, with an estimated decline in GDP growth from 4.8% in 2022 to 4.5% in 2023. Despite these, the country has demonstrated a high commitment to build resilience to climate change and contribute to the overall Paris goal.

Can You import a used car in Liberia?

In 2013, the government, pursuant to the Revenue Code of Liberia Act of 2000, as amended in 2011, placed a restriction on the importation of used motor vehicles more than 10 years old, whether intended for the transport of passengers or goods or for private or commercial use.

Who regulates environmental protection in Liberia?

However, specific sectors of the Act creating the Environmental Protection Agency of Liberia (EPA), the Environment Protection and Management Law of the Republic of Liberia, as well as the National Environmental Policy of the Republic of Liberia give policy the EPA regulatory jurisdiction over the sector.

Why did Liberia develop the National Gender Policy?

In 2009, Liberia developed the Liberia National Gender Policy (NGP) to demonstrate the government's political will to eliminate all forms of gender-based discrimination in order to achieve gender equality.

Exports satisfy a surge in demand from Europe. More than half of the solar modules exported from China in the first half of 2023 were destined for Europe (58%). The region has also seen the greatest absolute growth worldwide, with exports of solar panels from China to Europe up 47% year-on-year. 66 GW were shipped to Europe in the first half of 2023, up from ...

Research firm EUPD Research says that the European Union's (EU) solar PV module excess inventory reached 47.2 GW in 2022 and may hit 40 GW in 2023. In a new report provided to pv magazine, the ...
