

Why should solar panels be installed in Madrid?

The installations of solar panels in Madrid have the opportunity to receive a current regional aid which is established within the Strategic Plan of Subsidies with the aim of: Encourage renewable energies Reduce users' energy bills. To save on household and business energy bills. Reduce energy demand from polluting sources. Who can benefit?

How much solar irradiation does Madrid have?

Madrid is characterised by high solar irradiation, which means that the photovoltaic production capacity in the area is high. In fact, the Madrid region has an annual irradiation of approximately 2,100 kWh/m². This irradiation will be distributed as follows throughout the year: [graph re.jrc.ec.europa.eu].

Are solar panels tax deductible in Madrid?

In fact, you can deduct from 20% to 60% of the total cost of the solar panel system. Undoubtedly, it is an extra help that reduces the years of recovery of the investment. In addition to the above-mentioned subsidies, the rebate is interesting. What is the price of solar panels in Madrid? The cost of the installation.

What is the Ibi rebate on solar panels in Madrid?

Its interest is important because, depending on the municipality, the aid reaches a maximum of 50% over a period of up to 10 years. Although it is true that the average term is 4 or 5 years. To find out what is the IBI rebate on solar panels in Madrid, take a look at the following table:

How many people in Madrid benefit from a subsidy?

Approximately 91% of the population living in the Madrid region can benefit from this subsidy. And we tell you more: It is in the top 5 of the most subsidised communities, together with Ceuta, Catalonia, Aragon and La Rioja. But not only this.
