

Mobile portable power supply

What can portable power stations help with?

Portable power stations can help with camping for the weekend, living off-grid, or protecting against power outages. Over the past few years, as people have turned away from gas-guzzling generators, portable power stations have enjoyed a meteoric rise. You can buy tons of power stations with varying portability and capacity.

What devices can a portable power station run?

So long as your portable power station has the right ports and enough capacity, it can run a massive range of devices, including phones, laptops, and desktops. Higher capacity units will also let you power appliances and charge electric vehicles. Check which ports your preferred model has, including USB Type-A and Type-C, AC and mains sockets.

How to choose a portable power station?

Before you buy, check the specs of the power station. Consider the charging speed, as large-capacity stations can take a long time to recharge. Make sure you understand how quickly your chosen power station can charge from the mains and other sources like solar panels, a car battery, or another power source for top-ups.

What is a portable power station?

Portable power stations are generally designed to power smaller electronic devices and appliances, from phones and table fans to heavy-duty work lights and CPAP machines. Pay attention to the estimated watt-hours each brand provides in its specs to determine which model makes the most sense for what you'd like to power.

What are the best portable power stations?

To help you decide, I tested the efficiency, in a variety of scenarios, of the best portable power stations from Jackery, Oupes, EcoFlow, Anker, Goal Zero, Greccell, Bluetti, Dakota Lithium, Lion Energy, Vtoman, and Ugreen. [What to Know Before Purchasing a Portable Power Station](#)

How much power can a portable power station hold?

While a particular power station might claim to hold 1,000 watt hours, the actual amount of usable power you can get out of it is a different story. The best portable power stations also have an onboard computer that shows you how much energy is left in your unit, as well as how much power it's currently using.
