What is a portable charger & power bank?

Portable chargers and power banks are the best ways to keep your devices running no matter where you are. They're lightweight, small, and can easily fit into your pocket or purse. However, there's some confusion on what is a powerbank and how it differs from portable chargers.

What is a power bank?

A power bank is the same as a portable charger, both designed to charge devices like smartphones and tablets on the go. These compact and rechargeable battery packs are essential for travel or emergencies, providing a convenient solution to keep your devices powered without relying on a wall outlet.

What features should you consider when buying a portable power bank?

Pass-through charging is another feature to consider; with it, you can charge your device and a portable power bank simultaneously. That's convenient if both your phone and backup battery are running on empty.

How many times can a power bank charge a phone?

If you want to charge your phone twice or thrice, then a portable phone charger with 10000 mAh will work fine and fit in your pocket. But if you're planning on charging your phone more than three times, then a 20000mAh is the way to go. Are all power banks portable? Not all, but most. The main thing that makes a power bank "portable" is its size.

Should you buy a portable battery or power bank?

Watching your phone or tablet steadily run out of power when you're nowhere near an outlet is stressful. But there's an easy solution: a portable battery or power bank. These are available in many sizes and capacities and can include handy features like fast charging and extra ports.

Do you need a power bank or a battery charger?

The best solution to ensure you won't have a dying battery while out and about is to pick up portable battery chargers or power banks. You don't have to pick between a great charger and a great power bank, or spend double on getting both. The Anker 733 Power Bank takes care of all your charging needs.
