This paper proposes a capacitance estimation method of the supercapacitor bank in the supercapacitor energy storage system (SCCESS). To diagnose a deterioration, the capacitance of the supercapacitor bank is estimated by using a current injection. The injected current causes an AC ripple voltage and AC ripple current in the supercapacitor bank, which are extracted by ...

Supercapacitors typically do not need trickle charge or pre-charge, do not require charge termination and can be constantly topped off. Luckily, most chargers allow termination to be disabled. But only a few Li-ion chargers allow trickle charge to be disabled. Therefore, some modification from default settings and/or additional circuitry
