

# Outdoor power outage

What can make a power outage more dangerous?

Even an animal or too many A/C units on the power grid can cause a power outage. Tornadoes, hurricanes, severe thunderstorms, flooding, and extreme weather events can easily knock out power in your home. Deal first with the biggest safety issues: bringing light to the dark, staying warm and dry, and providing food to yourself and your family.

What are some causes of power outages?

Power outages can be caused by a variety of factors, including tornadoes, hurricanes, severe thunderstorms, flooding, and extreme weather events. However, even an animal or too many A/C units on the power grid can cause an outage. When dealing with a power outage, it's important to first address the biggest safety issues.

How can I get through a power outage?

The best way to get through a power outage is to avoid it altogether. Investing in a home generator can save you a lot of time and stress during emergency outages, as it can keep your heat and light running when you really need it.

How does a power outage affect a community?

Extended power outages may impact the whole community and the economy. A power outage is when the electrical power goes out unexpectedly. A power outage may: Disrupt communications, water and transportation. Close retail businesses, grocery stores, gas stations, ATMs, banks and other services. Cause food spoilage and water contamination.

Can you use a camping stove during a power outage?

Emergency Cooking Gear: You can also use a folding camping stove that uses sterno cans or other safe, portable fuels, or MagicCook cups or bags, which are chemical-based heaters that boil water without a flame. These options allow you to warm meals, boil water, or even prepare hot drinks during a power outage.

What should you avoid during a power outage?

During a power outage, avoid using candles or an open flame as a light source, especially if there are children or pets in the home. While romantic, they can tip over too easily in an emergency situation. However, if this is all you have on hand, just be careful not to leave candles or fuel-lit lamps unattended. Use secure candle holders.

Dusk-to-dawn lighting uses a light sensing photocell to operate your outdoor lights during dark hours. Motion sensor security lighting uses a motion sensor and a photocell to operate your exterior light for a predetermined
