

Outdoor power supply sold in Paris

What type of plugs does Paris use?

Paris uses power outlets and plugs of types C & E. Take a look at the pictures below to see what these plugs and power sockets look like: Doesn't look familiar? Do the outlets look different in your country? You'll need a power plug adapter. Type C - The standard European plug.

Are there electrical outlets in Paris?

No, the electrical outlets in Paris are different from those in the United States. In Paris electrical outlets of types C & E are used, while the United States has electrical outlets of types A & B. Do I need a travel adapter for Paris? The electrical outlets and power plugs in Paris are of types C & E (see images).

Does France have a plug & socket system?

Unlike almost all other European countries, France has standardized on the Belgian plug and socket system. Fortunately, this does not pose a problem since the Belgian standard is fully compatible with the German type F system, which is used in the rest of Continental Europe. What is the mains voltage in France?

What is the standard power socket voltage in Paris?

All power sockets in Paris provide a standard voltage of 230V with a standard frequency of 50Hz. You can use all your equipment in Paris if the outlet voltage in your own country is between 220V-240V. This is the case in most of Europe, Australia, the United Kingdom and most countries in Africa and Asia.

What is the mains voltage in France?

Just like the rest of Europe, the voltage in France is 230 volts and the frequency is 50 Hz. Although the origin of the type E plug and socket system is unclear, it was likely developed in the 1920s by the Belgian electrical accessories manufacturer Vynckier (now part of General Electric Power Controls).

What voltage is used in Paris?

The voltage used in Paris is 230V with a frequency of 50Hz. If the voltage and/or frequency in your country is different, you may need a voltage converter if your hair dryer, hair straightener or curling iron is not compatible with this.

Unlike other western countries, France generates some 70% of its electricity from nuclear power, with around 12% coming from hydroelectric power stations and around 17% coming from recycled nuclear fuel*. All of this means that France's electricity is among the cheapest in Europe--good news for homeowners.
