

Photovoltaic Module Export Index

Where do solar PV exports come from?

The latest monthly solar PV export data from the world's largest exporter, China, by country or region of destination. Ember China solar export dataset provides the following information: The IEA has stated that China's solar photovoltaic exports account for 80% of the global market.

How many solar modules does China Export to Europe?

Over the last 12 months, China exported 111 GW of solar modules to Europe, the same amount as the total installed PV capacity of the United States. With a total over the last 12 months of 19 GW, Brazil is the largest single destination for China's solar module exports outside of Europe.

How many solar panels does China Export in 2023?

Solar modules, which are fully assembled solar panels, accounted for 90% (\$23.8 bn) of China's total solar exports by value in the first half of 2023. Over the last 12 months, China exported 111 GW of solar modules to Europe, the same amount as the total installed PV capacity of the United States.

Will Saudi Arabia export solar panels from China?

Solar panel exports from China to Saudi Arabia grew more than sixfold from a low base in 2022 (0.4 GW) to reach 2.8 GW in the first half of 2023, driven by large-scale projects. Module exports from China over the last 12 months now stand at 3.6 GW, and would generate 2% of Saudi Arabia's annual electricity demand.

What is the Ember China solar export dataset?

Ember China solar export dataset provides the following information: The IEA has stated that China's solar photovoltaic exports account for 80% of the global market. Ember's China solar exports dataset is sourced from the General Administration of Customs of the People's Republic of China (GACC): Data is available from 2017 to present.

What is the commodity code for photovoltaic cells?

From 2022 and onwards, the commodity code used is 85414300 (Photovoltaic cells assembled in modules or made up into panels). From 2022 and onwards the code 85414200 (Photovoltaic cells not assembled in modules or made up into panels) is excluded from this dataset.

Discover data on Photovoltaic: Import and Export in China. Explore expert forecasts and historical data on economic indicators across 195+ countries. ... Photovoltaic cells: Assembled in modules or Made up into panels data was reported at -27.850 % in Feb 2025. This records a decrease from the previous number of 20.590 % for Jan 2025. CN ...

India's PV module exports surged in fiscal 2023, says ICRA India exported \$1.02 billion of solar cells and modules in fiscal 2022-23, and the United States was the top destination, according to ...

Photovoltaic Module Export Index

Source and disposition of photovoltaic cell shipments, 2022 (peak kilowatts)----6 Source and disposition of photovoltaic module shipments, 2022 (peak kilowatts) 7 Photovoltaic module import shipments by country, 2022 (peak kilowatts) 8 Destination of photovoltaic module export shipments, 2022 (peak kilowatts)----9 U.S. photovoltaic module ...

Solar PV products are a significant export for China. In 2021, the value of China's solar PV exports was over USD 30 billion, almost 7% of China's trade surplus over the last five years. In addition, Chinese investments in Malaysia and Viet Nam also made these countries major exporters of PV products, accounting for around 10% and 5% ...

China's solar module exports fell to 16.53 GW in September, down 12% from August and 16% year on year, according to PV InfoLink. Third-quarter exports reached 54.9 GW, a 15% drop from the second ...

The US was a key export market for Indian solar photovoltaic (PV) modules, accounting for more than 97% of the country's solar PV exports in both FY2023 and FY2024. With the expiration of the Free Trade Agreement and an ...

March 28, 2025 China's PV module exports reach 39 GW in Jan-Feb 2025, down 11% YoY . March 18, 2025 China to implement on-grid tariffs, exposing its PV industry to market competition. March 17, 2025 Exploring Solar Industry Trends and Growth Opportunities in 2025. Keywords .

According to data compiled by InfoLink, China exported 88.8 GW of modules in 2021, a 35.3% increase that is chiefly attributed to major PV markets, such as Europe, Brazil, and India. China module export outlook. The chart shows China exporting more modules to the world in 2021 than in 2020.

Module Price Index; PV Project Exchange ... rates of 3,403.96% on imports of crystalline silicon photovoltaic cells and modules from Cambodia; 81.24% AD rates and 168.80% CVD rates from Malaysia ...

From pv magazine India. India's solar module exports rose 91% to \$1.9 billion in fiscal 2023-24. The US market was the biggest destination, accounting for 98.5% of India's total PV module exports.

Overview. Beginning in January 2017, we required some of the respondents for the annual survey Form EIA-63B, Photovoltaic Module Shipments Report, to report monthly data. The subset of respondents now must report monthly accounts for about 90% of photovoltaic (PV) activity in the United States, based on 2021 data.

The export volumes of wafers, cells, and PV modules reached 70.3GW, 39.3GW, and 211.7GW, respectively, with year-on-year growth rates of 93.6%, 65.5%, and 37.9%. This leap forward shows the competitiveness of Chinese PV products in the global market and reflects the high degree of international market dependence on Chinese PV products.

The PV module exports from India to the U.S. have increased exponentially in the fiscal year (FY) 2023 (16x from FY2022 by value). In the backdrop of huge manufacturing capacities being set up in the U.S. under IRA, Indian PV module exports to the U.S. may experience a period of stagnation from 2025 and later decline from 2027 onwards.

The export value of PV modules from India increased by more than 23 times in just two years between FY2022 and FY2024. Several factors have contributed to this rapid increase in PV exports from India FY 2022. These include reduced demand for domestic PV modules following the delayed implementation of the Approved List of Models and ...

However, compared with the same period in 2023, the total volume and value of China's PV module exports to Europe from January to May this year showed a significant decline, with the total volume dropping by 20.59% and the export value plummeting by 49.53%. Among other regions, in May this year, the Asian market export value and export volume ...
