

Photovoltaic glass greenhouse in Johannesburg South Africa

What types of greenhouses does Richel offer?

In addition to plastic-clad greenhouses, Richel also delivers glass greenhouses, semi-closed greenhouse technology, multi-tunnels for low tech horticulture and more. Models include bay widths of 6.4m, 8.0m, 9.6m, 12.8m and 16.0m.

Who makes multispan greenhouses?

We offer multispan greenhouses designed and manufactured by Richel, France, who are the largest exporter of polyethylene clad greenhouses in the world. Richel delivers 350 hectares of greenhouses a year, over 500 projects, to more than 80 countries. Greener Solutions are the local agents for Richel in the SADC region.

What is a galvanised steel greenhouse?

This galvanised steel structure covered with special "Long Life" 3 layer greenhouse film comes with easy to assemble prefabricated components. Large areas can be constructed in a short period of time and the large scale structures are commonly used for large scale flower growers, vegetable growers and cutting companies.

What is the brightest greenhouse?

Models include bay widths of 6.4m, 8.0m, 9.6m, 12.8m and 16.0m. The use of high tensile steel, 2.4 times stronger than standard greenhouse steel, has given Richel the edge over other manufacturers, allowing taller and wider structures without having to use light-diminishing trellis beams. The result is the brightest greenhouse on the market today.
