What Is an Uninterruptible Power Supply (UPS) An UPS is a device that supplies power to connected devices for a certain period of time in the event of a power failure due to a power failure.. It has a built-in battery and supplies power to servers, PC electronic equipment, network equipment, etc. in the event of power failure or power supply trouble, for example.

For tough industrial situations, the PCS100 UPS-I and PowerLine DPA for example ensure protection from power quality events, delivering clean, continuous power supply to your process, even under the most extreme environmental conditions.

Things to consider when choosing a uninterruptible power supply (UPS) Why you need a UPS (Uninterruptible Power Supply) As the name implies, an uninterruptible power supply is just that: uninterruptible. This means power ...
