

Can a containerised generator power a construction site?

At Dale, we have a wide range of containerised generator units that can power everything from a construction site to a hospital and even large scale events. Dale's containerised generator units are able to offer bespoke designed solutions to meet your specific site requirements.

What is a containerised generator?

Containerised generators offer increased levels of weather protection for the generator unit in harsh environments. For example they're ideal for exposed locations, marine environment, oil and gas applications. As they're enclosed in a secure container that is usually a clean environment they often require less maintenance.

Why should you choose a containerised generator?

Fire Detection Panels and Intruder Alarms: Enhanced safety and security. Our containerised generators are suitable for a wide range of applications, including: Super Silent: Super silent 65dBA at 1m for prime power running diesel and gas. Critical Backup Power: For MOD, NHS, and HMP sites, ensuring reliable performance in emergencies.

Our generators are the perfect solution wherever power has to be generated reliably and efficiently - whether in an industrial plant, a large gas or steam power plant or for the grid fed by renewables. Our generators cover a power range of over 25 MVA. In addition, we provide wind generators from 0.25 to 10 MW.

Generator Container has the advantages of a small footprint, easy installation, and transportation, short construction cycle, strong environmental adaptability, intelligence, etc. ... We locate besides local Yangzhou port, the products ...

To check your container status, enter the container number, bill of lading, or booking reference into a container check tool. These tools provide real-time updates on the location and status of your shipment. You'll see if the container is in transit, at a port, or cleared through customs, helping you stay informed throughout the journey.
