Are portable power stations a good idea?

Portable power stations are a great way to take power with you when out and about-- like a power bank, only much bigger. Whether you're hiking, camping, or going on an RV vacation, there's a power station to suit your needs. Also: The best cheap portable power stations

What is the best portable power supply?

After carefully researching all of the different options on the market today, we have concluded that the SUAOKI Portable Power Station is by far the best portable power supply out there. It comes with a multitude of charging ports and options, which means that if you have a device that needs to be charged, this unit will have you covered.

How do I select a portable power station?

First, determine your power needs. The capacity of a portable power station is listed in watt-hours (Wh) or sometimes kilowatt-hours (kWh). Next, consider your budget. Portable power stations can be expensive, but discounts, sales, and deals are common. If you can afford to wait, you can likely get your chosen power station for less.

What devices can a portable power station run?

So long as your portable power station has the right ports and enough capacity, it can run a massive range of devices, including phones, laptops, and desktops. Higher capacity units will also let you power appliances and charge electric vehicles. Check which ports your preferred model has, including USB Type-A and Type-C, AC and mains sockets.

Do portable power stations have a surge function?

Most power stations have a surge function that allows them to output more power for a short period of time. This feature is sometimes called by different names, such as 'AmpUp' by Zendure or 'X-Boost' by EcoFlow. Ensure your chosen power station can handle the wattage you need.

What is a portable power station?

Portable power stations are generally designed to power smaller electronic devices and appliances, from phones and table fans to heavy-duty work lights and CPAP machines. Pay attention to the estimated watt-hours each brand provides in its specs to determine which model makes the most sense for what you'd like to power.
