

Price quote for UPS uninterruptible power supply for Dili Electric Power

An Uninterruptible Power Supply (UPS) is designed to deliver backup power when you need it most. These devices, which are also sometimes referred to as a battery backup, take over in situations where the voltage drops or your regular power source fails. ... inclement weather and electrical failures can all cause your facility's power to be ...

Installing an uninterruptible power supply is an excellent way to protect your mission critical systems. However, it is no guarantee of continual power as UPS components and UPS batteries can fail if they are not properly maintained to a high standard. A planned program of UPS maintenance should always be considered as an essential part of any ...

A UPS (Uninterrupted Power Supply) is a backup battery that keeps the equipment plugged into it running in the event of a power outage. It's not just a glorified power bank, because the UPS detects interruptions in the power and automatically switches the connected devices to running off the UPS battery, so they don't shut down.
