

Pristina outdoor power supply model specifications

What is a Senographe Pristina?

The Senographe*Pristina is a full field digital mammography system designed to offer an extensive breast care solution with screening and diagnostic capabilities, focused on an ergonomic design for the technologist and patient comfort. Senographe Pristina features a 24 x 29 cm detector, designed to offer full breast coverage in a single image.

Does Senographe Pristina need calibration?

Senographe Pristina features a 24 x 29 cm detector, designed to offer full breast coverage in a single image. Smaller breasts can also be imaged in any view with paddles that can slide to both sides of the detector. The Senographe Pristina does not need daily calibration. Not cleared or approved by the FDA for commercial availability in the USA.

Is the Senographe Pristina fully integrated with NBSS?

The evaluation took place between February and June 2017 and the system was fully integrated with NBSS, CRIS and GE PACS without issue. The Senographe Pristina was well received overall and generally performed well with downtime of less than 1 day due to mechanical problems.

When was the GE Healthcare Senographe Pristina installed?

The GE Healthcare Senographe Pristina was installed in February 2017 for the purpose of the evaluation which was completed between February 2017 and June 2017. The Senographe Pristina is a full-field digital mammography unit with a 3-D option which enables the machine to generate both 2-D and 3-D images.

What software is used in the evaluation of Senographe Pristina?

Software MGA-1.2.0-2 and Operating system MG Helios-6.6.2-1.3 has been used throughout the evaluation. The Senographe Pristina is powered by a high frequency single phase generator which is integrated into the gantry. It uses a 24cm x 29cm caesium iodide detector with 100 micron resolution.

Are there any security issues with the Senographe Pristina?

There were no security issues. The Senographe Pristina was located in a static unit which was locked and security protected out of hours. The unit was password protected when not in use. All electronic patient data was stored within NBSS, the SenoIris workstation and GE PACS systems.

The most popular sizes of power supply are 750w, 500w, 850w and 1000w. 750 watt power supplies are the most common and are sufficient for most computers while leaving ample room for future upgrades. Power supplies for gaming PCs may require a higher wattage because of their powerful graphics cards and processors.

Power consumption is directly related to the operating voltage (V) and current drawn (Amp/A).The power consumption is the product of operating voltage and current drawn. 3. Voltage / Current / Phase / Frequency (V / A / O / f) Voltage (V) for small residential aircons is the standard voltage at the plug (110 V for the U.S., 220 V for India, and so on).

Effective Cooling Option With a high airflow volume of up to 547CFM, the VOLTAS 183 Vectra Prism 1.5-ton Split Air Conditioner is tailored for rooms as spacious as 170Sq.Ft. Moreover, you can beat the heat in record time with this split air conditioner's turbo cooling, which offers rapid cooling to keep you comfortable and refreshed.
