Why should you choose CPSY® CPY series modular UPS?

As the professional manufacturer, the CPSY® CPY series Modular UPS with separated components also called decentralized technology is the only possibility to work without the risk of a "single point of failure".

Why is UPS called an uninterruptible power supply?

UPS is called an uninterruptible power supply as it can quickly switch to the power supply mode when there is a power failure, so that when using computer, the important files will not be lost, which is not used as the backup power supply.

What is CPY series modular UPS?

CPY series modular UPS adopts online double-conversion technology, and its performance is as high as 94.5% at 50% load. It significantly reduces the overall total cost of ownership (TCO). 4.

What are the features of a modular UPS module?

Each UPS module has an electronic rectifier, inverter, static bypass switch, back-feed protection, battery fuse, and control logic LCD display to guarantee autonomous operation. CPSY ® is one of the top 10 largest modular UPS manufacturers in China.
