

Recommended small UPS uninterruptible power supply in Botswana

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS) helps prevent sudden shutdowns, data loss, and hardware damage by providing backup power when your main electricity fails. For home users, a UPS can protect desktop PCs, gaming consoles, and smart home devices from unexpected power cuts.

Do you need an uninterruptible power supply?

To protect your likely expensive investment, an uninterruptible power supply is integral. This applies especially to areas that suffer from frequent power outages, particularly rural areas, extreme climates, or places with bad power grids. In order to buy the right UPS, however, you'll need to make sure that some basic requirements are met.

What is a ups & how does it work?

What is a UPS? UPS stands for uninterruptible power supply, it's a device that acts as a battery backup in case of an electrical power failure. Small UPS machines for homes and offices supply enough power for a few minutes, so there's time to turn off devices properly without losing any work.
