Sitting at 462 metres tall, the Lakhta Centre is the tallest building not just in Russia, but in Europe, and will serve as the headquarters for global energy giant, Gazprom. The multifunctional complex is situated along the coast of the Gulf of Finland and has become an architectural centrepiece within the Saint Petersburg's Central Business District.

Saint Petersburg. As the second-largest economic hub in Russia, Saint Petersburg has a solid industrial base that is predominantly powered by tool manufacturing companies. The shipbuilding, aerospace, and mechanical engineering sectors in the city are the main driving forces behind the need for high-quality and precision tools in the market.

St. Petersburg is the Russian Federation's second major city and arguably its cultural capital. Western influences have shaped St. Petersburg's origins and cultural life, including its architectural style and built fabric, more than any other Russian city, yet its full transition to a globalized and modern European city remains in question. St.
