Nestled within Italy's borders, the Republic of San Marino might be Europe's third-smallest country, but its energy ambitions are anything but tiny. With limited land for traditional power plants and a growing commitment to renewable energy, this microstate has become an unexpected testing ground for cutting-edge battery storage solutions[5].

These solutions, based on power and control electronics, meet the energy manageability needs with regard to generation, distribution and consumption. Integration of battery storage in renewable energy generation plants (PV, wind power, marine, etc.). Integration of battery energy storage or supercapacitors in power grids.
