

What is a commercial photovoltaic system in Cyprus?

Commercial photovoltaic systems in Cyprus are usually used by businesses for self-consumption. That is, the energy generated by the solar panels is solely used for the building where the panels are installed.

Why should you buy a photovoltaic system in Cyprus?

In Cyprus, the sun shines almost all year long. You can get deductions on your electricity bill. Photovoltaics in Cyprus can increase the value of a property. Photovoltaic panels in Cyprus require minimum maintenance. The lifespan of photovoltaic panels in Cyprus can reach 25 years.

What are solar panels used for in Cyprus?

Solar panels in Cyprus are used for residential, industrial and commercial properties. Other than home use, many businesses install photovoltaic panels in Cyprus for self-consumption. That is, they use the energy the photovoltaic system generates directly, but cannot store any excess energy for following months.

Where can photovoltaic panels be installed in Cyprus?

Photovoltaic systems can be installed on flat and inclined roofs and on the ground. Our team can visit the place where you want the solar panels to be installed, evaluate the amount of space, sun exposure and possible shading and suggest the best place so that you make the most out of your photovoltaic panels in Cyprus.

Who is eligible for a photovoltaic system in Cyprus?

Anyone with Cyprus permanent residency is eligible for a photovoltaic system in Cyprus, given that the property they want the panels to be installed on is interconnected with the EAC network and it was built according to the regulations of the Department of Town Planning and Housing.

How long do photovoltaic panels last in Cyprus?

Photovoltaic panels in Cyprus require minimum maintenance. The lifespan of photovoltaic panels in Cyprus can reach 25 years. The real estate market in Cyprus has shifted towards sustainability and the photovoltaic systems play a huge role in adding extra value to properties.

We install the latest quality of solar panels, installations services, maintenance services. top of page. ... An accurate quotation is essential to ensure you will make the most out of your photovoltaic system, by producing enough energy to cover your needs. ... our after-sales services include full customer support and through the assistance ...

Nicosia, Cyprus (latitude 35.1638, longitude 33.3639) is a suitable location for generating solar PV energy due to its position in the Northern Temperate Zone. The average daily energy production per kW of installed solar varies by season: 8 kWh in summer, 4.84 kWh in autumn, 3.08 kWh in winter, and 6.67 kWh in spring.

The Group offers every household in Cyprus the possibility of saving on energy consumption by utilising solar energy. To date, hundreds of residential consumers have entrusted the Group with energy solutions of photovoltaic systems, electric vehicle chargers and cooling, heating and ventilation services, finding significant reductions in their ...
