What happened at the 2025 SEforALL Global Forum?

The Forum was filled with inspiring talks, bold commitments and transformative actions to accelerate progress towards clean, affordable energy for all by 2030 and a just and inclusive energy transition. Here are the key highlights from the 2025 SEforALL Global Forum. Global leaders call for greater action

Sierra Leone's energy needs are under resourced and the scarcity of a reliable energy supply is one of the key impediments to Sierra Leone's economic and social development. The country's installed power capacity per capita is among the lowest in the world with approximately 105 MW available for a population of over 7 million in 2018 ...

The Sierra Leone Opportunity. The Baomahun Gold Project is situated approximately 200km east of the capital Freetown, in the Valunia and Kunike Barina Chiefdoms in the Bo and Tonkolili Districts respectively. Our host community is the village of Baomahun, which is home to a population of approximately 7,000 people.

FREETOWN, Sierra Leone, 20 September - Sustainable Energy for All (SEforALL) has now extended the Sierra Leone Healthcare Electrification Project to provide solar power electrification of 0.308 Megawatt peak (MWp) to an additional government hospital in Kailahun and 25 Community Health Centres (CHCs) across the country.. Currently, 18 of these CHCs ...

READ: Somalia launches tender for 12MW hybrid solar plus storage project The project is expected to reduce annual CO2 emissions by 94,000 tonnes and create around 250 direct and 1,500 indirect jobs. Climate Fund Managers (CFM) will contribute US \$3.1M toward the project from its EU-backed Climate Investor Two Fund, supporting early-stage development ...

Sierra Leone 2025 Energy Storage Project

The plan marks a significant step in achieving universal energy access and economic development in Sierra Leone with a target of 100% electrification by 2040, while also establishing the country's environmental stewardship. It strives for economic growth across key sectors like power, transport, industry, buildings, appliances, and agriculture.

Across Africa, including in Sierra Leone, the solar PV industry is beginning to gain momentum. Image: Teraco. African renewable energy company Infinity Power has reportedly signed a memorandum of ...

The project, led by Nant Energy, is supported by the U.S. Agency for International Development Finance (DFC), which noted that the initiative could almost double Sierra Leone's energy capacity. The DFC has specified that this will be the country's first gas-fired power plant, with construction scheduled for completion in 36 months.

Register for Enlit Africa 2025, taking place on 20-22 May at the CTICC in Cape Town, South Africa. This waste to power project will be a major boost for energy generation in the country as Sierra Leone has one of the lowest rates of electricity access in the world. Sierra Leone looking to increase energy output

AOG affiliate PetroJetty has given Dutch engineering company BAM International and its South African joint venture partner Stefanutti Stocks a contract for the engineering, procurement and construction of a petroleum jetty at the Kissy Oil Terminal in Freetown. PetroJetty is the local affiliate of trading and downstream company Oryx Energies.

Sierra Leone Telegraph: 19 January 2025: PowerGen Renewable Energy (PowerGen) has partnered with leading international investors to establish a scalable, distributed renewable energy platform targeting the deployment of 120 MW of renewable power, including battery energy storage solutions across Africa.

The energy storage arm of Chinese solar PV inverter manufacturer Sungrow announced the signing of an agreement earlier this week with renewable energy company MSR-Green Energy (MSR-GE) for the 100MW/400MWh project in Sabah, a state in northern Borneo.

Freetown, Sierra Leone, 27 February 2025: Climate Fund Managers ("CFM"), a climate-focused blended finance investment manager operating across Africa, Asia and Latin America, announces its latest investment to co-develop a 30MW municipal waste-to-energy project ("the Project") in Freetown, the capital of Sierra Leone. The Project, a ...

Currently, only 23% of the population in Sierra Leone has access to electricity. This project will increase the operational domestic electricity supply by 30% in Sierra Leone, channelling it to commercial and industrial entities, ...

Infinity Power and Sierra Leone's Ministry of Energy have signed an agreement to develop 1GW of

Sierra Leone 2025 Energy Storage Project

renewable energy by 2033, aimed at improving energy access and supporting the country's environmental goals. ... In addition to improving access to energy, the project is expected to create numerous jobs and support Sierra Leone's environmental ...

The US Trade and Development Agency (USTDA) has put out a tender request for a 25MW hybrid solar-diesel-storage project in Sierra Leone. The facility will be developed by local independent power ...

How solar energy is powering hospitals and schools in Sierra Leone. UNOPS is working with the government of Sierra Leone to develop solar mini-grid and standalone renewable energy systems with funding from the World Bank. The project will provide some 3,000 households, 500 schools, 350 businesses and 200 health facilities with access to ...
